Summer fun and learning!

MALTA MONTESSORI SUMMER CAMP

2015

Elementary Class

Cooking and Culture 'Round the World

July 6-17 8:30-11:30

In this two week summer camp, children will visit a new country from around the globe daily, prepare different recipes and gain new understanding of the culture and people of each country. Additional activities will include art projects, language education and games to enhance each child's experience of the many cultures that make up their diverse and wondrous world.

Explore STEM: Science, Technology, Engineering, Mathematics

July 20-31 8:30-11:30

Nurture your child's scientific curiosity and enrich their future! In this hands-on two week summer camp, students will use the STEM approach to discover new things, create, build, solve problems and learn how things work. Why STEM? STEM education engages students and equips them with critical thinking, problem solving, creative and collaborative skills that will ultimately better connect them to their school, workplace, community and world.

Time Travel: Ancient Greece!

August 3-14 8:30-11:30

The Ancient Greek world was rich with art, stories and great thinkers. Join us as we use our imaginations to travel back in time and become acquainted with the culture of the Greek world. We will explore Greek myths through stories, drama and art projects. We will taste the food of this time, build model landmarks and discover how the Greeks influenced our modern culture. We will meet the Greek philosophers and mathematicians, as we playfully explore their ideas. Finally, we will culminate with a "dress up day" where we invite you to come dressed as your favorite Greek God, Goddess or Hero. This will be a fun session of story, craft and puzzles to enrich your summer!

Theater Games

August 17-28 8:30-11:30

Enjoy two weeks of drama, fun and games. Play acting games and learn to improvise as you entertain your friends. We will experience the fun of developing a character and getting laughs! We will also learn the more serious parts of acting, such as blocking a scene and projecting our voices. Put your skills to use as you act out poetry, scripts and skits that you write with your friends. Release your inner actor during these weeks in the spotlight!

Preventing the Summer Slide

July 6-Aug 28 12:30-3:00

The goal of this afternoon program is to stop what is widely known as the ***summer slide***. As parents approach the summer break, many are thinking about the family vacation, how to keep children engaged in activities at home, the abrupt changes to everyone's schedule—and how to juggle it all. What they might not be focusing on is how much educational ground their children could lose during the two-month break from school, particularly when it comes to reading. Experts agree that children who read during the summer gain reading skills, while those who do not often slide backward. Within this program, students will receive individualized reading, writing and math instruction to maintain their current level of academic ability and support an increase in any areas of need.

STEM
Science • Technology • Engineering • Math

Session 1:(July 6-17) Cooking and Culture 'Round the World

__ Half Day Morning ___ Full Day

__ Extended Day 1 ___ Extended Day 2

Session 2:(July 20-31) Explore STEM: Science, Technology, Engineering, Mathematics

__ Half Day Morning ___ Full Day

__ Extended Day 1 ___ Extended Day 2
